PG EASY CeramicPS

COMPACT GRINDING DISCS

Learn more

NEXT LEVEL INNOVATIONS.

- glass fibre-reinforced back plate and triangular, precision-shaped ceramic grain for maximum performance
- deep depressed centre allows working at a flat angle and ensures perfect synchronous run and aggressivity
- no accessories or additional backing pad required
- longest tool life

2 IN 1

eliminates the need to
switch between fibre discs
and grinding discs

PG EASY CeramicPS

PRECISION-SHAPED CERAMIC GRAIN FOR THE TOUGHEST TASKS

Thanks to the perfectly geometrically shaped grinding particles combined with the innovative PG tool design, you can achieve entirely new levels of removal speeds and chip removal rates. There is no need for an additional backing pad and its optimised value-for-money design is a persuasive purchasing argument.

- The integrated glass fibre-reinforced back plate for maximum performance ensures high stability and durability combined with working convenience. Synchronous operation and aggressiveness in top condition!
- The thin and lightweight design of the PG Easy CeramicPS makes it the perfect tool for mobile applications in small workshops. The elimination of fibre discs and grinding discs makes work easier. The low applied grinding pressure and minimal power consumption make the PG Easy CeramicPS ideal for use with cordless angle grinders. Precision and efficiency in one tool.
